

**Delivering Actionable IoT Insights from the Intelligent Edge**

Blueforce builds software products that provide insights at the edge...  
enabling rapid, secure, intelligent connectivity between people, sensors, and systems...  
to increase situational awareness, reduce cognitive load, and drive operational efficiency...  
to accelerate decision making through a “single pane of glass”.

**OUR PRODUCTS**

A turnkey multi-OS IoT/sensor communication platform that delivers  
shared and real-time actionable insights

Windows/browser tablet or PC  
“Single Pane of Glass” dashboard for  
shared situational awareness with  
plugin layer for human, vehicle, and/  
or proximate sensors.

Extensible mobile application that  
fuses multiple body attached/  
proximate sensors on a single human/  
animal endpoint with real-time and  
secure information sharing.

Mobile app, built on the Blueforce  
core, for lone worker safety, delivering  
location, secure text, imagery, “listen  
live”, checkin/checkout and full  
interoperability.

Massively scalable autonomous  
application that fuses unattended  
ground sensors, fixed facility sensors,  
autonomous platforms, and AI/  
information services.

**BENEFITS**

Patented Extensible Mobile  
Edge Compute Sensor and  
Services Fusion Engine

**Sensor Fusion**

Eliminate silos of IoT through our  
sensor fusion engine that  
communicates with, consumes,  
processes, and normalizes one or  
more person-attached and/or  
proximate IoT sensors

**Rapid Swarming**

Enables rapid formation of people,  
sensors, and systems and securely  
self-synchronizes processed location,  
sensor, and collaboration data  
between each of the enclave  
members, human or silicon.

**Rapid Adaptation**

Rapid extensibility through software  
plugins that leverage our readily  
available Blueforce API/SDK. Go from  
concept to capability in days for most  
sensors and/or information systems.

**Platform Agnostic**

Scales up and down based on  
available compute and service  
platform. Blueforce can run on the  
sensor head, wearables, mobile  
devices, 5G MEC, laptop/tablet, and  
hybrid cloud devices.

**ROBUST ECOSYSTEM**

More than **325** sensors from **90** partner  
manufacturers supported today. Blueforce  
is aggressively growing out cadre of value-  
added resellers and service provider  
partners for resale, design, installation,  
training, and support.

“All of the information is transmitted in real time  
and displayed at a central command hub that  
resembles something from the TV drama "24."

**The Boston Globe**
